(54) METHOD FOR CHANGING DISPLAY PICTURE

(57)Abstract:

PURPOSE: To efficiently change display information displayed on a display device by matching the change of the display information with a human operation image.

CONSTITUTION: The operation of an input device having an input button and a track ball is judged by an input device operation table, and when the operation is one of turning a page toward a succeeding page, the display picture of the 1st page displayed on a prescribed position (1601) on the display device is expanded and moved (1602, 1603) to the outside of the display device simultaneously with the expansion so as to be erased, and the display screen of the 2nd page is displayed on the prescribed position. When the operation is one of turning a page back to the preceding page, the display picture of the 2nd page is displayed on the prescribed position (1601) on the display device and the display screen of the 1st page is moved from the outside of the display device to the inside, thereof reduced (1603, 1602) simultaneously with the movement and displayed on the prescribed position (1601).
